

“**HERBS&OILS**” was created with the aim of producing organic aromatic herbs and high-quality essential oils, verticalizing production and marketing the products in domestic and foreign markets.

Our company implements an integrated quality management system in accordance with the requirements of the international standard **ISO 9001:2015**. It is a fundamental policy of our company to establish and maintain high quality standards for the products and services we provide.

The quality management system we apply is implemented to all stages of production and to all functions of the company. Regular evaluations are being carried out in order to ensure continuous improvement, and therefore the continuous improvement of our products and services to our customers and partners.

The goals of HERBS&OILS are:

- The production of products of high and stable quality.
- The long-term effective collaborations with customers and suppliers. These partnerships are based on trust and mutual benefit and are being strengthened by our commitment to continuous improvement.
- The perfect training and cooperation with our staff in all production stages.
- The compliance with relevant legislation and regulations as well as requirements of the applicable standards and specifications.
- The respect for the environment and ecosystem in which we operate by applying Good Biodiversity Practices and Good Agriculture Practices.
- The compliance with moral values and ethics in our company's relations with our customers, partners and staff.
- The risk approach to identify and address threats or the utilization of opportunities that may affect the compliance of our services and products, as well as our company's ability to enhance the satisfaction of our customers and partners.
- Our high level of infrastructure.

The management of the company **MALINIS D. NIKOLAOS** with the distinctive title **HERBS&OILS** is committed to our customers and partners for the continuous effort on our part, in order to respond responsibly and efficiently to their demands and expectations.
